SEED → SOIL → FIBER → FABRIC → DESIGN

ABOUT THE SYMPOSIUM

Hemp, from field to finished form

The Farm to Fabric Hemp Textile Symposium brings together farmers, manufacturers, designers, Indigenous knowledge keepers, artists, educators, students, and brands to explore how industrial hemp can shape the future of fashion, textiles, regenerative manufacturing, and climate mitigation.

Through exhibitions, live conversations, family programming, hands-on demonstrations, and a closing magazine release and fashion showcase, attendees will experience hemp not just as a material, but as a story rooted in culture, craftsmanship, innovation, and sustainability.
